

**FOR IMMEDIATE RELEASE**

**Hyphen Solutions Announces a New Product for Small and Mid Size Builders**

*BuildPro Express – Bringing the industry’s leading scheduling and supply chain solution to the small and mid size builder*

**San Francisco, CA, May 30, 2007** – Hyphen Solutions, Ltd. announces the release of a new product called BuildPro Express. BuildPro Express was designed specifically for the small and mid size builder, allowing them to take advantage of the industry’s leading scheduling and supply chain solution that has been used successfully by many of the nation’s top home builders. BuildPro Express helps home builders organize their work and stay on track through every project. The system helps keep builders on budget, reduce cycle-time, manage more products at one time, and improve management’s ability to react to issues in the field on a daily basis with real-time information.

Hyphen historically has catered to the large production builders and is now addressing the need for a scheduling tool among a much wider audience. “Over the past year and a half, we’ve noticed that quite a few small and mid size builders have been hiring persons that were formerly with a large production builder that utilized our flagship product BuildPro. Once they got into their new roles, they realized they needed a scheduling tool like BuildPro but at a more affordable price. Subsequently we decided it was time to take many of the same features and functions found in BuildPro and make it available to the small and mid size builder market,” said Bob Swainhard, Senior Vice President of Sales.

BuildPro Express begins with creating templates which represent the builder’s current building process. From there, a schedule is created to build a home including all lead times on labor and material tasks, resulting in a real-time manageable schedule. Once the calendar has been established, building partners and suppliers communicate electronically, thus reducing the need for redundant telephone calls and faxes. BuildPro Express will help schedule start dates, phase durations, subcontractors, supplies required and budget parameters. Also included are twelve standard reports noting performance, productivity, job closes and more. Builders will also receive access and connectivity to SupplyPro ~ currently being used by over 8,500 building partners.
